RISEING WATERS.

Great Rainfall of Friday Brings the Rivers up With a Jump.

The rainstorms which passed over this section Friday, beginning early in the morning, were the most terrific for this season of the year in the memory of the "oldest inhabitant." The rain fell in torrents and in a few minutes every ravine, creek and run was bank full and overflowing. Both rivers rose rapidly at the average rate of one foot an hour and early in the day began to cause apprehension among business men and residents in the lower part of the city.

The C. & M. and T. & O. C. E. railways were both flooded and had trains delayed by the muddy overflow from Duck and Federal Creeks and the Z. & O. lost part of a trestle at Shawnee Junction. The Ohio River road again suffered east of here and trains were delayed many hours.

At Tunnel station, on the T. & O. C. E., the aqueduct carrying a stream across the mouth of the tunnel, broke with the great weight of water and flooded the tunnel to the depth of six feet. The heavy timbers of the aqueduct were driven entirely through the tunnel by the terrific rush of water.

The B. & O. east of Parkersburg also suffered damage and trains are not yet able to get through to Grafton. Several pump stations of the Buckeye Pipe Line Co. are under water and temporarily abandoned.

At seven o'clock Friday night a large crowd was at the foot of Front street watching the steadily rising waters. The river at that time was above the 25-foot mark and still creeping up at the rate of a foot an hour. At Wheeling the river was 23 feet and rising and all indications pointed to a 35 or 40 foot stage here.

The habit of the Muskingum rises, usually holding up for two or three days, was the chief cause of uneasiness, but the latest from Zanesville was to the effect that the stream at that point was stationary.

At midnight the marks showed 31 feet even and rising very slowly, crawling up at the rate of not over three inches an hour. This indicates that the top notch has been almost reached and the danger of an overflow on Front street is not even a remote possibility.

Taken in time Hood's Sarsaparilla prevents serious illness by keeping the blood pure and all the organs in a healthy condition.

STEVE BRODIE OUTDOES.

Bridge Jumping at Reduced Rates by a West Side Lad.

An amusing occurrence yesterday on the railroad bridge was the jumping from that structure into the muddy Muskingum, 23 feet below, of a West Side lad who is a veritable water nymph of the male persuasion.

Some chums on the bridge bantered the boy to jump into the river from the bridge, and he said he would do it for a chew of tobacco. The chew was granted, and in he went, and swam to shore like a duck. Coming back onto the bridge, he was being wrung out by the boys. He concluded he wanted to plunge again, and said he would do it again for a bottle of beer. The dime showed up immediately, and in the chap went, and he seemed to enjoy it—so did the crowd hugely.

There is no other remedy on earth so simple, so effective, so natural, in the cure of summer complaint in all its forms, as Dr. Fowler's Ext. of Wild Strawberry.

Just What's Needed

Exclaims thousands of people who have taken Hood's Sarsaparilla at this season of the year, and who have noted the success of the medicine in giving them relief from that tired feeling, waning appetite and state of extreme exhaustion after the close confinement of a long winter season, the busy time attendant upon a large and pressing business during the spring months and with vacation time yet some weeks distant. It is then that the building-up powers of Hood's Sarsaparilla are fully appreciated. It seems perfectly adapted to overcome that prostration caused by change of season, climate or life, and while it tones and sustains the system, it purifies and vitalizes the blood.

When a little one is expected in the family how lovingly the parents plan together for its future well-being. They sometimes even forecast its education and career. Does this seem too early to anticipate while the child is yet unborn? It isn't. The child's destiny has already been partly mapped out by Nature according to the disposition and habits of the parents. The best plan a mother can make for the future happiness of her unborn child is to maintain her own cheerfulness and health while her child's undeveloped being is still a part of hers. Her health at this critical period is of tremendous consequence to the little one's whole future existence. Every prospective mother will find direct nourishment, comfort and sustaining strength, in Dr. Pierce's Favorite Prescription. It will maintain her vitality both bodily and mental; shorten the period of confinement and make labor easy and almost painless. It imparts strength and elasticity to the organs concerned in parturition, invests the mother with recuperative energy against any after period of weakness and depression, and aids in the secretion of healthy nourishment for the child. It is the unfailing cure of all "female weaknesses."

Dear Doctor—Your "Favorite Prescription" is the best medicine to take before confinement that can be found. It proved so with me. I never suffered so little with any of my children as I did with my last, and she is the healthiest we have. When I began your treatment I could not stand on my feet long enough to wash my dishes without suffering almost death; now I do all my housework, washing, cooking, sewing, and everything for my family.

(Mrs.) **Dora A. Guthrie**

Dearness Not the Goal.

The silver men give away their case when they say that free coinage will "increase prices." The one universal human interest is cheapness. The ideal condition would be one wherein all desirable things were produced without any cost at all. Every advance toward that condition—that is to say, every cheapening of the necessities of life—is a great gain for everybody. On the other hand, every increase in the price of the necessities of life is a direct and grievous hurt to the people.

Mexico's Silver Dollar.

Mexico has free and unlimited coinage, and yet the Mexican silver dollar, although larger than ours, is quoted in New York, Paris, London and Berlin at 52 cents. It should be said also that in Mexico it is worth but 52 cents in gold, and that it passes there and elsewhere at its bullion value as measured by the money of commerce.
